"FERNANDES IS YOUR KEY TO A SUPERIOR REALM OF TONE AND THE REDEFINITION OF SOUND."

FERNANDES SUSTAINER™

SINCE THE 1960'S, ELECTRIC GUITARISTS HAVE BEEN LEFT SCRATCHING THEIR HEADS, SEEKING AN EFFECTIVE WAY TO CONTROL SUSTAIN AND FEEDBACK.
BEHOLD! THE FERNANDES SUSTAINER™
... PUTS THAT POWER RIGHT AT YOUR FINGERTIPS WITH JUST THE FLICK OF A SWITCH. BUST OUT TEXTURE AND TONAL COLORING ALA HENDRIX AT ANY LEVEL OF VOLUME WITH OUR PATENTED TECHNOLOGY. USE THE SUSTAINER ON SINGLE NOTES, USE IT ON CHORDS, ADJUST IT TO GIVE SWELLS OR FOR A GRADUAL DECAY TO THE 'SUSTAIN'.

A FEW WORDS OF WISDOM

'WITH THE FERNANDES SUSTAINER I THINK I'VE SCARED ALL OF THE OTHER ANIMALS AWAY. THE SOUNDS OF HELL JUST BECAME MORE INTERESTING.'
KERRY KING (SLAYER)

'MY FERNANDES SUSTAINER GIVES ME INFINITE SUSTAIN AS IT SHOULD BE WITH CONTROL AND MUSICALITY.'
THE EDGE (U2)

A GREAT THING TO HAVE WHEN YOU'RE IN A SONICALLY HOSTILE ENVIRONMENT'
SLASH (VELVET REVOLVER)

WHEN LOOKING TO EXPAND THE MUSICAL PALETTE OF SONIC WISDOM... THE FERNANDES SUSTAINER WILL TAKE YOU TO A WHOLE NEW HORIZON."
(STEVE STEVENS)

THE FERNANDES SUSTAINER GIVES MY GUITAR PLAYING A WHOLE NEW DIMENSION. AS A MATTER OF FACT IT'S SORT OF A DIMENSION OF SLOW MOTION. I ACTUALLY CAN PLAY LONG SLOW NOTES NOW.'
(STEVE VAI)

THE POWER OF INFINITE SUSTAIN

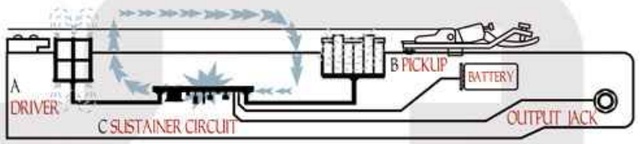
The Power of Infinite Sustain

What is the Fernandes Sustainer™?

The FERNANDES SUSTAINER™ is a uniquely designed electronic system that enables the controlled sustain of any single or group of notes within the guitar's sound range. At your discretion, strings will emit sound at a consistent intensity until stopped, regardless of output and/or location, even if the guitar is not connected to an amplifier! How's that for starters?

How does it work?

The patented FERNANDES SUSTAINER™ system generates a magnetic field causing the strings of the guitar to vibrate. Poweredby a 9-Volt battery, the interaction of the bridge humbucking pickup(B), the Sustainer Circuit Board(C) and the neck Sustainer Driver pickup(A), projects magnetic pulses that continuously vibrate the strings of the guitar, the same way an amplifier would at extreme volumes, yet totally controlled! The result is infinite sustain and/or feedback using sparkly clean or loud distorted settings without the need for excessive volume or extra outboard gear!



Modes

1. Natural Mode: The note(s) will continue to ring its natural fundamental tone as long as the string(s) are free to vibrate and the Sustainer System is on.
2. Harmonic Mode: Within seconds, the pitch of the ringing note(s) will rise to the 5th natural harmonic.
3. Mix Mode: Available on select models including our FSK-401 Sustainer Kit, the Mix mode blends the Natural and Harmonic Mode to harmonize indefinitely every ringing note creating a harmonized feedback effect.

What can the sustainer do for you?

Enhance your creativity with the Fernandes Sustainer™. Use with any combination of gear in your arsenal of effects, amp modelers and home recording equipment. Discover new sounds as you explore the world of controlled sustain and feedback.
How do you get natural sustain using digital effects?
You can't! It's The Fernandes Sustainer that makes this possible!

Picks

A high-tech attack on modern tone, the PPS and Stainless Steel represent the ultimate in guitar pick making technology.

- Models:

-PPS: Made from Polyphenlene Sulfide a material commonly used in automobile and computer parts the PPS picks are lightweight but hard enough to ensure picking is strong and precise, so the pick provides accurate attack with a full-bodied tone as it strikes thestring. Silicon rubber based surfacing on each side, makes this pick ideal for fast picking styles. Available in Teardrop and Jazz shapes, and 0.8mm-1.0mm-1.2mm gauges.

-Stainless: Stronger than Iron, resistant to corrosion and heat, with a brighter metallic tone, the Stainless Steel makes your attack nothing short of lethal.
